
CASE STUDY

May 2009

Product Details:

New Polyurethane general purpose die makers hammer
62mm head diameter x 125mm head length
Colour: yellow

Claim/Reason for Case Study

The polyurethane general purpose hammer is manufactured from a special hardness elastomer which offers high cohesive strength and cut resistance. This unique combination of strength and hardness will minimise chipping and cracking, and offer a very long life.

Original Hammer

Environment

Continuous usage on 2pt and 3pt steel rule.
"Busy" die shop, usual usage would be a Rawhide Mallet.

After 1 month of usage

The Rawhide Mallet would normally need replacing.
The yellow polyurethane hammer has had very little wear, no chipping or cracking.
